

Says

What have we heard them say?
What can we imagine them saying?

Unlocking insights into the global air transportation network with Tableau" suggests using the Tableau data visualization tool to analyze and gain valuable insights from data related to the global air transportation network. Tableau is a powerful platform for creating interactive and informative visualizations that can help researchers, analysts, and organizations better understand and make informed decisions about air travel trends, routes, passenger flows, and more. If you have specific questions or need assistance with using Tableau for this purpose, feel free to ask!

Thinks

What are their wants, needs, hopes, and dreams?
What other thoughts might influence their behavior?

Start by collecting relevant data about the global air transportation network. This could include data on airports, airlines, routes, passenger numbers, cargo volumes, and more.

TRAVELLER

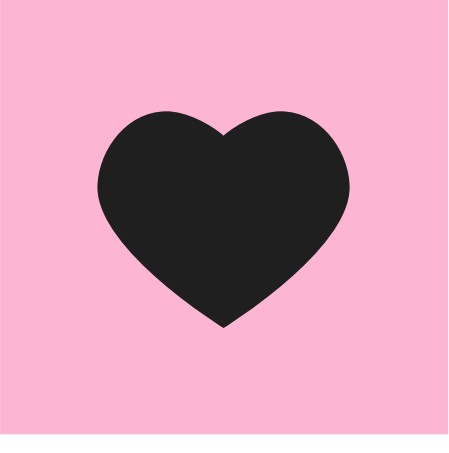

Start by collecting relevant data about the global air transportation network. This could include data on airports, airlines, routes, passenger numbers, cargo volumes, and more.

Use Tableau's drag-and-drop interface to create various types of visualizations. For analyzing the global air transportation network, consider using maps, scatter plots, network diagrams, and bar charts to represent different aspects of the data

Does

What behavior have we observed?
What can we imagine them doing?

Feels

What are their fears, frustrations, and anxieties?
What other feelings might influence their behavior?
